About me

Business Consultant with over 3 years of experience delivering business transformation, supply chain, public sector, and banking projects. Experienced in supporting business transformation, PMO, process improvement, and performance management initiatives across public and private sector organizations. Strong background in business analysis, project governance, reporting, stakeholder management, and operational excellence. Experienced in facilitating workshops, analyzing complex business challenges, designing data-driven solutions, and supporting the successful delivery of transformation projects. Passionate about leveraging data, technology, and structured methodologies to improve organizational performance and create measurable business value.

Professional Experience | Relevant Projects *(Non-Exhaustive)*

[July, 2023 – Present] – Deloitte

- Conducted analysis and consolidation of financial, operational, procurement, and business data to support strategic decision-making.
- Developed management reports, executive dashboards, KPIs, and performance monitoring tools.
- Monitored project, operational, and business performance, identifying trends, risks, issues, and improvement opportunities.
- Designed and implemented reporting solutions, analytical models, and decision-support tools to improve efficiency, transparency, and information quality.
- Project Management Office (PMO) activities, including project planning, progress tracking, governance reporting, risk and issue management, dependency management, action tracking, and stakeholder coordination.
- Managed project governance documentation, including status reports, RAID logs, risk registers, issue logs, action trackers, and executive communications.
- Coordinated cross-functional teams, workshops, meetings, and stakeholder engagement activities to ensure alignment and successful delivery.
- Gathered, analysed, documented, and validated business and functional requirements across multiple stakeholders and business units.
- Facilitated workshops, interviews, process review sessions, and requirements discussions to support business transformation initiatives.
- Conducted business process analysis, process mapping, gap assessments, and process improvement initiatives.
- Designed future-state (To-Be) processes and supported the implementation of operational and technological transformation initiatives.
- Supported supply chain, procurement, logistics, supplier management, contract management, and inventory optimisation initiatives.

- Performed data-driven assessments to identify operational inefficiencies, cost-reduction opportunities, and process enhancement initiatives.
- Participated in the implementation and adoption of enterprise and business systems, ensuring alignment between business requirements and solution delivery.
- Prepared executive presentations, steering committee materials, governance packs, and management reporting artefacts.
- Managed project schedules, milestones, deliverables, and performance indicators to support effective projects and project execution.
- Supported change management, business readiness, and solution adoption activities.
- Delivered training, knowledge transfer, and capability-building sessions on business processes, reporting tools, dashboards, and data management practices.
- Developed training materials, practical exercises, user guides, and supporting documentation to strengthen organizational capabilities.
- Provided ongoing support, mentoring, and user assistance to promote sustainable adoption of tools, processes, and best practices.
- Collaborated with business, technology teams, vendors, and external partners to support projects delivery and organizational transformation initiatives.

[March – June; 2023] - Deloitte | Internship as a Programmer

- Develop, test and maintain software applications for internal and external customers.
- Participate in all phases of the software development life cycle.
- Collaborate with multidisciplinary teams to define, design, and launch new features.
- Identify and fix software problems, improving performance and usability.
- Apply agile software development methodologies.
- Implement technical solutions aligned with customers' business objectives.
- Ensure code quality through reviews and testing.
