About me

Business Analyst with more than 3 years of professional experience with experience in data transformation, modelling, and reporting, with experience in managing data flows and delivering actionable insights through business-driven dashboards. I have a strong ability to ensure data quality and integrity, monitor financial and contractual execution, identify risks and optimize processes, contributing to greater efficiency, control and organizational performance.

Professional Experience (*Non-Exhaustive*)

[July, 2023 – Present] - Deloitte | Business Analyst

- Analysis and consolidation of financial and operational data, producing reports and dashboards to support decision making.
- Ensuring data quality, integrity, and consistency through continuous validation and reconciliation of information.
- Monitoring of performance indicators (KPIs), ensuring control over budget execution, procurement and operations.
- Development, standardization and improvement of reporting processes, increasing efficiency, transparency and reliability of information.
- Structuring and maintaining financial and administrative records in accordance with international best practices.
- Identification of deviations, inconsistencies and operational risks, proposing and monitoring the implementation of corrective actions.
- Production of analytical and strategic reports, with recommendations for improving organizational performance.
- Process mapping and optimization (AS-IS / TO-BE), with a focus on automation, efficiency and internal control.
- Development of financial management and procurement tools, reinforcing traceability and discipline in execution.
- Training teams in the areas of financial management, internal control, reporting and use of data to support management.
- Implementation of continuous improvement practices, strengthening internal control systems and mitigating risks (fraud, waste or misuse of resources).
- Collaboration with stakeholders in the definition of requirements, priorities and data-driven solutions, ensuring alignment between technical and business areas.
- Guarantee of operational continuity and efficiency in the execution of projects, through close monitoring of teams and processes.

[March – June; 2023] - Deloitte | Internship as a Programmer

- Develop, test and maintain software applications for internal and external customers.
- Participate in all phases of the software development life cycle.
- Collaborate with multidisciplinary teams to define, design, and launch new features.
- Identify and fix software problems, improving performance and usability.

- Apply agile software development methodologies.
- Implement technical solutions aligned with customers' business objectives.
- Ensure code quality through reviews and testing.

Education

- **2025** – Bachelor's degree in computer and Telecommunications Engineering, ISUTC
